MEET YOUR MACRO MENTOR

# TIBOR MOLNAR

Tibor Molnar, your macro photography mentor, is a master in the realm of close-up wonders. With his lens, he transforms everyday objects and minuscule subjects into stunning visual stories. Tibor's expertise is your key to unlocking the secrets of macro photography, where he'll guide you through the art of capturing tiny details that often go unnoticed.

Prepare to be inspired and elevate your photography game under Tibor's guidance, as he shares his passion, knowledge, and unique perspective on the captivating world of macro photography.

# WHAT IS MACRO?

With macro photography, small is the new big. With the power of specialized lenses and equipment, it allows you to capture intricate details that often go unnoticed by the naked eye. Get ready to embark on a journey where even the smallest of subjects become larger than life.

## MACRO LENS

OM SYSTEM OLYMPUS M.Zuiko Digital ED 60mm F2.8 Macro

This is my current go-to lens. On a micro 4/3 sensor it is actually a 120mm equivalent. It makes the whole system light and I can easily support it with one hand.

## MIRRORLESS CAMERA OM SYSTEM OM-1

Camera I use most often. With the micro 4/3 sensor which gives additional depth, it's a great option for macro. The focus bracketing built in makes this a superior system for advanced macro photography.

## MACRO FLASH CONTROL THE LIGHTING

A flash with a dedicated macro diffuser gives the freedom to carefully and creatively control the lighting for your macro photography, to help illuminate your subject when working close up. This essentially gives you a studio in your pocket and helps showcase all the details of your subject.

# ACCESSORIES

## AND OTHER NEEDS

## MACRO BACKGROUND CARDS - FOR COLOR

Macro background cards are a really great product to help add some color behind your subject. It helps create a clean and uniform image and there are a wide variety of colors from which to choose.

## MICROFIBER REUSABLE CLEANING CLOTH

These colorful cleaning cloths can not only add a pop of color to the background but they can also be very handy to wipe off equipment and keep it free of rain and dirt.

## SLONIK HEADLAMP RECHARGABLE USB

More than just a headlamp, it is my favorite personal focus light. Any small headlamp will work but this one is easy to place on the flash and has a rechargeable USB battery.

## QUADHANDS WORKBENCH HELPING HANDS

This is a very useful pair of clamps that has multiple bendable clips and points that can hold things in extremely precise positions for your shoot.

“Macro photography reminds us that size truly does not matter when it comes to capturing the marvels of our world. Through the lens, we unveil a universe of intricacies, where the smallest details become epic narratives. It's a testament to the beauty that surrounds us, often hidden in plain sight. So, let your camera be your guide, and let's embark on a journey together, discovering that the tiniest subjects can inspire the grandest of emotions.”
